CTV Vertical Centrifugal Pumps

provide reliable circulation and fluid transfer of various liquids

The CTV are a vertical, seal less centrifugal pumps made from PP, PVDF or AISI 316L stainless steel. The CTV series are single-stage pumps with the pump casing directly submerged in the liquid. It is driven by an asynchronous electric motor. They are successfully used in various applications in today's industries.

CTV - plastic execution (PP or PVDF)

- » impeller with **high back vanes to avoid liquid** from reaching the motor.
- » motor shaft sleeve in **PP or PVDF to avoid any metal in contact with the liquid** – no corrosion

CTV - stainless steel execution (AISI 316L)

- » **open impeller** for good solids handling
- » **all wetted metal components** made of corrosion resistant **AISI 316L stainless steel**

EN 10204

Certificates may vary depending on material execution of particular product.

Features

- ✓ Leakage free & safe dry running
- ✓ Low maintenance cost
- ✓ Replacing self-priming pumps
- ✓ Handling liquids with particles possible (up to Ø 6 mm)

Options and special executions

Suction extension (PP, PVDF, SS)

It is a great solution **when there is a need to empty a tank** or sump from a lower level than the immersion depth of the pump.

A 500 mm and 1000 mm extension pipe is available as a standard.

Left-hand thread on pump cover (PP, PVDF)

For plastic CTV pump there is an option of a left-hand thread on the pump cover. The thread can be differed from standard one with a cut on the socket.

This way unintentional unscrewing of pump cover is avoided. This option is recommended **especially when viscous liquids are pumped**.

Strainer (PP, PVDF, SS)

A suction strainer is also a possible option **where the liquid is dirty or contains solids**.

Optional discharge connection (PP, PVDF, SS)

If required, the CTV pump can be delivered with optional connections on the discharge side. Flanges following **ANSI and DIN standard are available**. Loose or welded flange.

Wide range of applications

CTM

Industries:

- » **chemical,**
- » **surface treatment,**
- » **machinery, echanical,**
- » **foundry,**
- » **paint,**
- » **wastewater treatment plants**

Applications:

acids,
toxic and corrosive chemicals,
detergent concentrates,
circulation of galvanic baths,

feeding and unloading of storage tanks, filters,
containers, sumps.
powering process equipment, dosing systems,
dispensing units, test rigs.

Mobile Pump Solutions

solve the problem of spread technological processes

The portability of the units allows easy movement to various locations. This means almost limitless application.

Mobile pump units are available in both hygienic and industrial designs. The great advantage is the compatibility with the majority of Tapflo centrifugal pumps range.

Moreover, it is possible to compose the trolley to your own needs by using a number of accessories such as ON-OFF switches, frequency inverters, or cable holders.

Hygienic Trolleys

- » Stainless steel polished drip tray
- » Valve for drainage
- » 3 sizes available

Industrial Trolleys

- » Stainless steel construction
- » Compact and strong baseplate
- » 3 sizes available
